## **DETAILED ACTION**

### ***Acknowledgment***

1. This Office Action is responsive to the amendment filed on 04/16/2009.

### ***Allowable Subject Matter***

2. Claims 1-10 are allowed over prior art of record.
3. The following is an examiner's statement of reasons for allowance:

The prior art of record, taken alone or in combination, fails to teach or fairly suggest the arrangement of a method of issuing a ticket paid for with illegal payment means during a transaction between a user and a ticket machine, at the end of which transaction the machine issues a ticket to the user in exchange for payment using payment means, the machine including means for detecting illegal payment means, the method comprising the steps of paying for the ticket by the user using a payment means; checking that the payment means used are regular, by the machine; if the payment means are checked as being regular, printing the ticket, during which a regular ticket is printed on a blank ticket or medium; issuing the ticket to the user; and especially the limitations of if the payment means are checked as being illegal, a print ticket is marked in such a manner as to enable the marked ticket to be distinguished from a regular ticket during an inspection operation as recited in claim 1 and further limitations of its dependent claims 2-10.

The previous cited references Wilder (US 5,408,417) teaches automated ticket sales and dispensing system is customer operated to provide tickets for various entertainment events, travel, etc. The system also accepting payment means such as

Art Unit: 2887

cash, credit card, personal check, etc. (see figs. 1-11). Wilder further teaches the system detecting or checking the payment means (cash) to determine if they are illegal (counterfeit). Beaty (US 5,682,819) teaches method of issuing or altering ticket to make the ticket less vulnerable to fraud by marking the ticket as void before it may be canceled (See figs. 1-3 and column 1, line 65 to column 2, line 35). Behm et al. (US 6,736,324) teaches ticket with barcode to further enhance security (see figs. 1-3B and column 1, line 65 to column 2, line 39).

However, without benefits of applicant's teaching, there is no motivation to a person of ordinary skill in the art at the time the invention was made to modify/combine the various features of prior art in a manner so as to create the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
